## SUMMERY

I'm an aspiring Junior Full Stack (MERN), Web Developer, with expertise in both Front End & Back End.  I am capable of making innovative, user-friendly, and intuitive user interfaces with a great user experience. I've done many projects, and faced many problems but the good part is I never felt like giving up on solving problems. I have good taste in User Interface design. I understand the process to make an application User Friendly.
